

The Authorization *Gap*

Tens of thousands of AI agent incidents just went public. The institutions meant to authorize these systems are finding out they never held the pen.

AI MODELS & RESEARCH

309B

parameters, MIT-licensed, with
a 1M-token context window

The open-source supply chain now runs through Beijing as readily as San Francisco.

THE STILL SIGNAL

Every institution touched by AI is discovering it is not the one holding the pen. Capability shipped first; authorization is still being drafted.
